

FOLEX – WILL BE AGAIN YOUR DISCUSSION PARTNER REGARDING CUSTOM COATING AT THE FAIR ICE EUROPE 2017

Munich, 21. -23.03.2017, Hall A6, Stand 476

We can offer you tailor made solutions due to our extensive experience and our innovative capabilities. At the ICE 2017 the broad spectrum of attendees have the possibility for discussions with Folex personnel in a direct, confidential and competent manner.

Our "know how" is based on coating and lamination of the web which is applied roll to roll. Substrates like films, woven materials and metallised foils can be coated in a variety of thicknesses between 0.005 mm and more than 2.00 mm. Coatings can be water or solvent based. UV-curing is also an option. Other forms of treatments such as Corona, thermal stabilisation, laminating and hot melt coatings are also possible, as well as coating under clean room conditions.

In the converting we cut various substrates according to our clients strict guidelines. We offer also glueing, perforating and packaging and if desired we can take care of shipping and logistics.

For further information please contact Robert Nigg at Folex AG.

ABOUT FOLEX

The Folex group specialises in the finishing and coating of films and specialities and has production companies based in Switzerland (Schwyz) and Germany (Cologne and Erlangen) that offer high-quality products and tailor made services for a wide variety of markets. Today Folex offers solutions for many sectors, from the printing industry or digital and large format printing, the office and home sector, all the way to primary products for the electronics industry.

More information on our complete portfolio is available at www.folex.com.
