

LOPEC 2018- PREVIEW

Munich, 14 - 15.03.2018, joint booth COPT Center, Hall B0, Stand 405

FOLEX PRESENTS PRINTED ELECTRONIC SUBSTRATES AT LOPEC 2018

Cologne, 22.01.2018 - While many topics in the field of printed electronics are still under heavy development - Folex is the substrate provider for printed applications! The company has been manufacturing for the print-on industry substrates for all types of printing technologies and ink-types for many years. These years of experience and continuous, innovative development have led to an extensive portfolio of films and speciality substrates.

Printed electronic applications sit well in this field of experience. The specific challenges (scratches interrupting circuits, thermal shrinking during printing and curing, etc.) in both printing and etching based circuit manufacturing are met with mature products.

Folex is happy to consult and provide you with appropriate substrates in the format of your choice. Folex is involved in various collaborations with leading research institutes and industrial partners in the field of printed electronics and is a member of the OE-A.

We look forward to welcoming you to the exhibition booth Hall B0, Stand 405 (COPT Center booth).

ABOUT FOLEX

The Folex group specialises in the finishing and coating of films and specialities and has production sites based in Switzerland (Schwyz) and Germany (Cologne and Erlangen) that offer high-quality products and tailor made services for a wide variety of markets. Today Folex offers solutions for many sectors, from the printing industry or digital and large format printing, the office and home sector, all the way to primary products for the electronics industry.

More information on our complete portfolio is available at www.folex.com.
