

## FOLEX AT LOPEC IN MUNICH

11.03.2022 | Hall B0 | Stand 116

### FOLEX PRESENTS FLEXIBLE MATERIALS THAT CAN BE PRINTED WITH CONDUCTIVE INKS

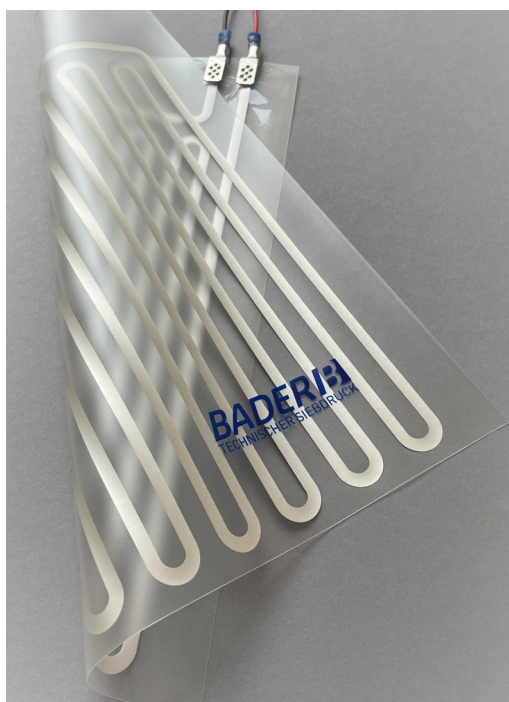

From March 23 to 24, LOPEC 2022 will take place in Munich - the international trade fair for printed electronics. We invite you to visit us at our stand 116, hall B0.

Fofox provides tailor-made industrial solutions for printed electronics. At LOPEC 2022, we will be showcasing stretchy but mechanically stabilised materials for printing with conductive inks. These can be used, among other things, for heating applications, "wearables" (intelligent textiles) and medical applications. A highly flexible heating element printed on the Fofox GO-PU/SM (TPU film) will also be on display.

Visitors to the trade fair will also have the opportunity to see coated, transparent substrates made of TPU, PET and PC, as well as application examples on EL-NG (PET, electrically conductive), CF-T1/PD NEW QUALITY (thermostabilised polyester film) and PC-HC (polycarbonate with hardcoat coating).

This year, we welcome you to view on our stand some excellent prototypes created and developed in various co-operations.

We look forward to your visit!
