

# Folabase®

## Tear-resistant underpacking foils for the printing unit

The globally established, tear-resistant Folabase® underpacking foils have been making an important contribution to efficient processes and resource conservation in high-performance printing for many years. They guarantee perfect print lengths and offer additional protection for the printing cylinder. Folabase® underpacking films are also extremely robust and can be reused without any problems.

### Folabase® top features

- Perfect cylinder protection
- High tear resistance
- Narrow thickness gradations
- Chemical resistant
- Adhesive and non-adhesive

### Special characteristics

- Adhesive with excellent shear strength
- Non-slip surface
- Additives to prevent cylinder corrosion
- Siliconised propylene as release liner

### Your benefits

- Extension of cylinder service life
- Long service life of the base
- Reusability
- Dimensionally stable
- Easy removal
- Resistant to swelling
- Resistant to chemicals and cleaning agents
- Good temperature stability
- Resistant to crumpling (self-healing)
- Constant print length
- Problem-free disposal (no PVC)
